

CYCLE 9. KEYNOTE 1
Scripter

SEASONS CHANGE

Early in the year it is really windy and you don't feel too hot

It is nice because you can be outdoors and feel fresh

Then, by late March or early April, breeze begins to go away

So you feel muggy

It is not a nice sensation, at least for me

In this time you look for indoors with air conditioner

By October or November the rainy season starts

In those months the streets become real lakes

There are no sewers in the city!!

By January it starts all over again
