

CYCLE22. KEYNOTE 4  
Scripter

GOT IT?

I don't understand why these two words have the same meaning!

Which ones?

*Scientist* and *scientific*. I've looked them up and they mean the same

It's because you looked them up in a bilingual dictionary

Yeah, and what does it have to do with that?

Well, that they belong to different levels. One is a noun and the other one is an adjective

How do you know?

Because of the suffixes. *-ist* is an ending that indicates profession...

...and *-ic* indicates adjective or characteristic. Got it?

Yeah, I think I got it
