

MY HERITAGES

My father loves technology

He always has the best of the best in computers

Every time he buys a new gadget he gives me the old one

He's got a new I-pad with Android system

So I've got his last computer, which is a super machine

Now I have a blackberry, a full color printer and a wireless mouse

I hope he never stops buying technology

Sometimes I show him new gadgets so that he buys them

And then I can make myself his last gadget

Someday his new I-pad will be mine
