

MY FIRST PARACHUTING LESSONS

I started learning how to fly a parachute

I know it presents some risks

But I was under the instructions of a specialist

The first day was boring

He taught me the parts of the parachute and bla, bla...

Then, we started doing short flights

Gosh! That was terrible

I felt I was flying miles, but it was just a couple of meters

In two more weeks I have made longer flights

I hope I can fly from a mountain in one month
