

CYCLE 11. KEYNOTE 5
Scripter

PERSONALITY TRAITS

Phlegmatic people are quiet and calm

Like my father: he hardly ever gets mad about anything

Sanguine people, on the other hand, are very, very talkative

They're extremely outgoing and kind of "the soul of the party"

Other kind of people fall into the category of being choleric

Those are the bossy ones. Most of the times they're in a bad mood all the time

The last kind of personality is the melancholy one

Those are the neat ones. I would say they suffer from OCD

"Where did you get all that stuff?"
